

Value

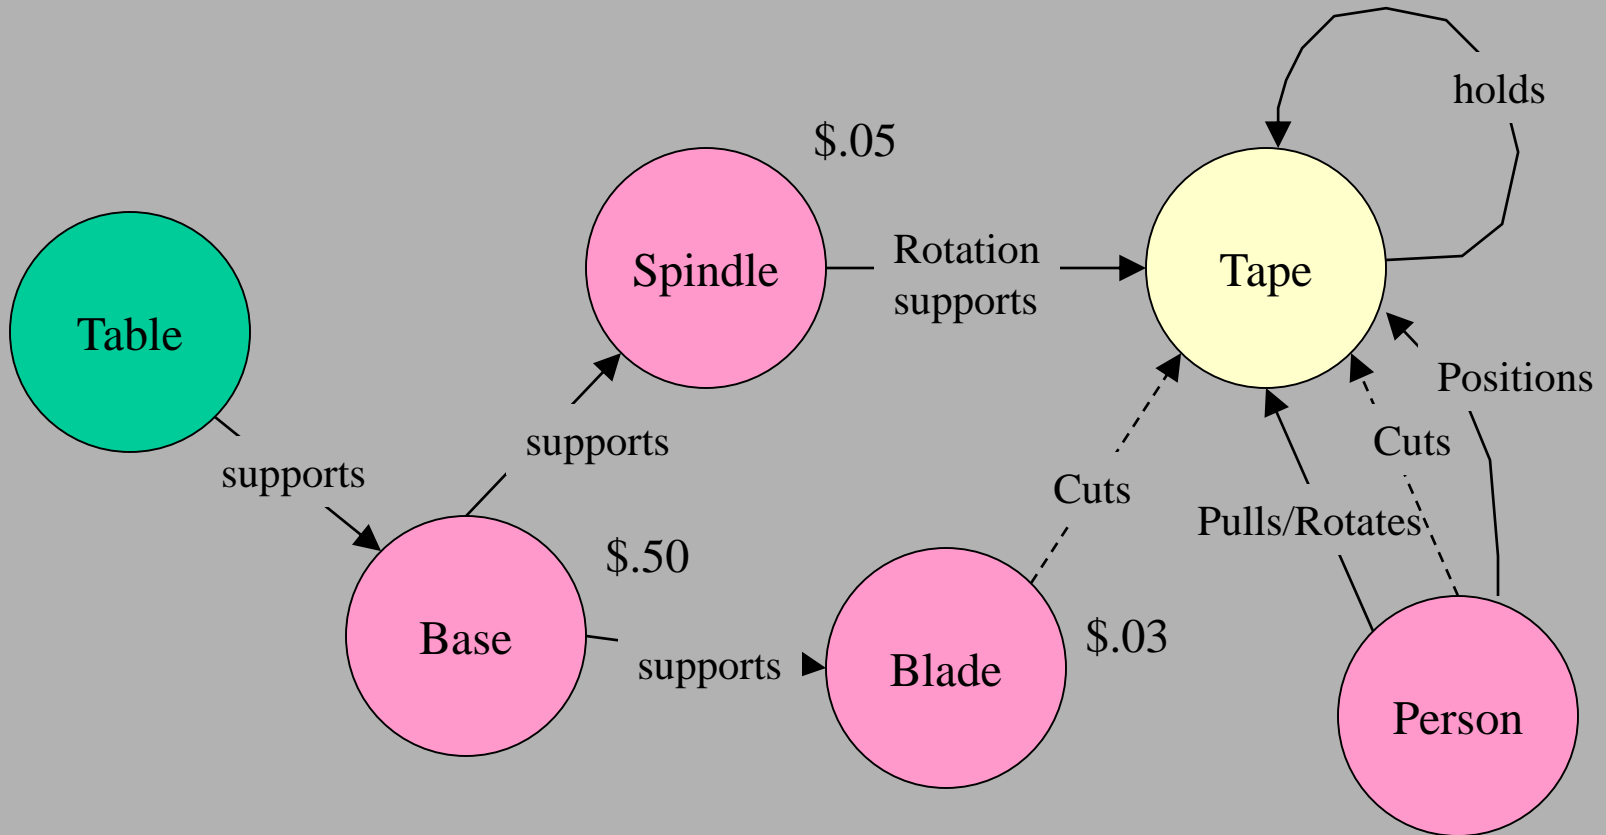

Auxiliary Functions

= Not Directly on System Product

Elements which deliver auxiliary functions often have low value and are candidates for elimination—Humans are always candidates

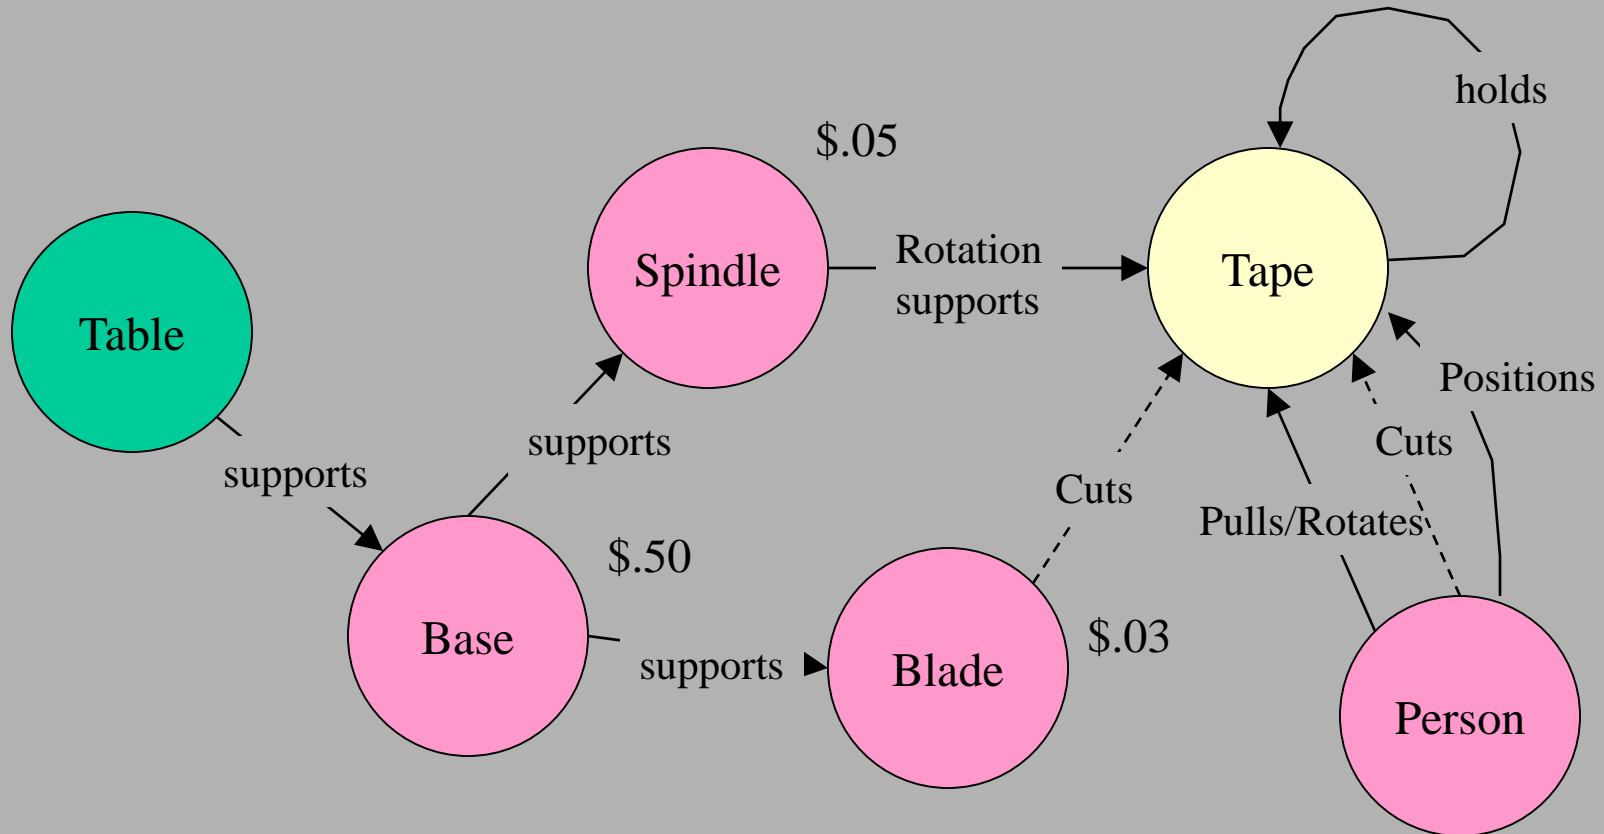

Penalties

Cost, Problems, Weight, etc are all Penalties

Element Value
= Cumulative Function Rank/Cost

Function Rank
Basic = 3
Auxiliary = 1
Harmful = 0

Based upon cost, which element is the best candidate for elimination? (The person is an automatic candidate unless it is the system product)
